

Meeting Objectives

- ☒ ~~Flush out how we want the project to look like~~
- ☒ ~~Tech stack~~
- ☒ ~~Platforms to target~~
- ☒ ~~Setup a repository~~
- ☒ ~~Ticketing system (Github issues)~~

App Idea

Music version of letterboxd

Tech Stack

Core

- DB
 - Postgres
- React native with expo
 - Erm... What is expo? —> Expo is a framework and toolchain built on top of React Native that makes it significantly easier to build and deploy React Native apps. (thx claude)
- Functional or Object Oriented?
 - Raymond prefers Functional
 - Brent prefers functional
- Go
 - Gin
 - GORM - open to checking
 - GQLGen
- Rest or GraphQL?
 - GraphQL
- Should we do automated testing?
 - Ray -> yes
 - Brent -> yes
 - Go: standard library, testify - open to checking
- Should we do CI/CD?
 - Ray: yes
 - Brent: yes
 - Github actions -> Job to build & package the app, run automated tests, etc.
- Containerized?

- Ray: yes
 - Brent: yes
 - Docker Compose w/3 containers, DB, UI, API
- Cloud Platform
 - AWS
- Infrastructure as Code
 - Terraform(?)
 - Anisble(?)
 - Ray -> yes
 - Brent -> yes
- Domain
 - Buy one once we figure out the name

Integrations

- Spotify API
- Apple Music API (if that's publicly accessible)

Platforms to Target

- IOS
- Android
- Web
